**HAROLD R. HENRICH**  
MASTERS OF METAL FABRICATION FOR BUSINESS AND INDUSTRY

## **Fabrication**

Obviously, when moving powder from Point 'A' to Point 'B' there is the need for custom designed, metal fabrications. Whether the need calls for a hopper, structural support steel, a little bracket, or carbon steel fabrications with epoxy paint systems, sanitary construction with electro polished or mirror polished finishes, **IEDCO** is prepared to meet the needs of the project.

Virtually everything we design is manufactured by several business partners in New Jersey. We have been working with these partners for about fifteen years now and we believe that their quality is second to none. Their state-of-the-art, punch-laser combination gives them capabilities and economy that most other shops just can't provide. Separation of stainless steel fabrication from carbon steel into a separate facility enables us to meet the increasing quality demands of the food and pharmaceutical industries, which we so heavily serve.

So once again, as a full service company, **IEDCO** is able to provide you with any custom design and fabrication that may be required as an integral part of meeting your powder handling challenges.

---

## **State of the Art Technology**

All operations are under one roof, from machining to finishing, designing to quality control. High standards have always been synonymous with **IEDCO** and our fabrication partners. Over four generations of experience in metal fabrications enable us and our "fab partner" to offer the most efficient and cost effective operation to date. Whether your application be laser cutting and welding of 20 gauge material or the bending and forming of 1/4" steel, experienced personnel is available to get the job done right.

No project in metal fabrication is too big or too small. We welcome the opportunity to take your application from prototype stage to the finished product, professionally and within your budget parameters.

Our proven track record of successful products and services speaks for itself with an impressive roster of repeat clients.
